- Status: Subcontractor to Uniplus.com
- Duration: July 2025 - 2028
- Services: Software engineering resources supporting state technology modernization
- Summary: Providing agile software development expertise to support Maryland's digital transformation initiatives. Our teams

Past Performance

U.S. Department of Veterans Affairs | Feb 2024 - Dec 2024

Role: Prime Contractor

Services: Provided comprehensive IT support services including technical assistance, infrastructure management, security implementation, and application development. Managed system configurations, coordinated large-scale deployments, and ensured compliance with federal security requirements. Delivered on-time solutions with high customer satisfaction ratings and maintained service level agreements consistently above 99% performance.

Security Engineer II (ECIOSS) | 2CM Technologies | 03/2023 – 10/2024

Services: Implemented advanced security measures across enterprise systems with a focus on zero-trust architecture. Conducted comprehensive vulnerability assessments using industry-standard tools including Nessus, Qualys, and Rapid7. Maintained federal cybersecurity compliance with NIST 800-53, FISMA, and FedRAMP requirements. Supported security infrastructure development through the implementation of multi-factor authentication, endpoint protection, and secure access service edge (SASE) solutions. Led threat hunting initiatives resulting in a 35% reduction in potential exploits.

GRC Analyst | USAContract Solutions, Houston, TX | 10/2021 – 09/2024

Services: Provided comprehensive compliance management services across diverse regulatory frameworks including CMMC, NIST, and ISO 27001. Conducted thorough risk assessments using quantitative and qualitative methodologies to identify vulnerabilities and prioritize remediation efforts. Implemented and monitored security controls aligned with industry best practices and federal requirements. Developed and maintained policies and procedures to ensure organizational compliance with evolving regulatory landscapes. Established risk mitigation strategies that reduced identified high-priority vulnerabilities by 42% within the first year.

Cloud Security Architect | Dimensional Behavior Health Services | 01/2020-06/2021

Services: Designed and implemented secure cloud infrastructure across AWS and Azure environments with emphasis on HIPAA compliance. Developed comprehensive cloud security strategies integrating identity management, data protection, and threat detection capabilities. Conducted thorough cloud security assessments to identify potential vulnerabilities and implemented remediation plans. Ensured compliance with relevant standards including NIST, SOC 2, and ISO 27001 through continuous
